1. Product Summary Overview

The product summary describes how user personas listed below withdraw and re-open an injury item on a case.

2. User Personas

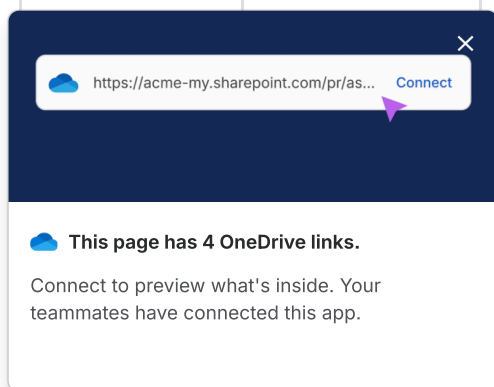

Persona	Permission Set Groups	Permission Set	Sharing Rules
Eligibility	Access to Permission Set Group		
	role of the		
	ML_Permission		
	based on the		
	(the user)		
	3_Permission_S		
	Group based on the		

	organisation of the user)		
Eligibility Officer (EO) Team Lead	• Agent Permission Set Group (Based on the role of the user) • Team Lead Permission Set Group (Based on the role of the user) • Lodgement_GB_Permission_Set_Group (Based on the organisation of the user) • Lodgement_EML_Permission_Set_Group (Based on the organisation of the user)		
Employer Contact		• Guest User Permission Set	
Injured Worker / Legal Representative / Nominated Representative		• Guest User Permission Set	

3. Requirements

3.1 Business Requirements

Process (L3)	Subprocess (L4)	User Story	Acceptance Criteria
3.5 Manage	3.5.1 Withdraw	3.5.1.1 As an EO, I want to be able to withdraw an Injury on a case upon the request of the IW	1. When an IW requests to withdraw a case: a. Via email, the system must allow the EO to save the email from the IQ in Content Manager. b. Via phone call, the system must allow the EO to 'log a call' and

automatically create a 'CM Document' record.

2. The system must allow the EO to navigate to the 'Decision' tab on the case.
3. The system must allow the EO to select 'Withdraw Claim'.
4. The system must allow the EO to select at least one or multiple injuries to withdraw from the case.
 - a. The system must only display injuries that have not been determined or previously withdrawn
5. The system must allow the EO to create the decision.
 - a. The system must default the 'Decision Status' to 'Withdrawn' and lock the field.
 - b. The system must allow the EO to select the 'Decision Reason'.
 - c. The system must allow the EO to enter in the 'Document Reference Number' for the record of the withdrawal request from the IW.
 - d. The system must default the 'Record Status' to 'Active' and lock the field.
 - e. The system must allow the EO to enter in the 'Decision Date'.
 - i. The system must not allow the decision date to precede the date of injury.
 - f. The system must allow the EO to enter in any additional information in 'Decision Comments'.
 - g. The system must allow the EO to select 'save'.

	6. Once save has been selected by the EO, the system must: a. Create a decision record. b. If all injuries on the case are withdrawn the system must: i. Automatically send an email to the IW and Employer using a predefined email template confirming that the case has been withdrawn. ii. Automatically send an SMS to the IW using a predefined template confirming that the case has been withdrawn. iii. Automatically send an email to all members of the case team (eg. MCM) using a predefined email template confirming that the case has been withdrawn. iv. Remove the MCM as the claim owner and replace with GB / EML work queue. v. Change the case owner from EO and replace with GB / EML work queue to release the EO capacity. c. Still provide appropriate users with access (ie. EO/ MCM can still add activities, add evidence etc.). d. Update status against the injury on the 'Injury Item' tab on the claim to 'withdrawn'. e. Update the status against the claim to 'withdrawn'
3.5.1.2 As an EO, when an Injury is withdrawn, I want	1. When all the injuries on the case have been marked as withdrawn by the EO, the system must place the following

3.5.1.2 As an EO, when an Injury is withdrawn, I want

1. When all the injuries on the case have been marked as withdrawn by the EO, the system must place the following

		the system to place the case in a freeze state to retain the Days KPI	case milestones in a freeze state as at the date of withdrawn case: 'Interim Benefits Days' if within the 0 - 10 day range 'Business Days Since Lodgement'
3.5 Manage Claim Withdrawal	3.5.2 Re-open the Injury	3.5.2.1 As an EO, I want to be able to re-open a withdrawn Injury upon the request of the IW	- When an IW requests to re-open a withdrawn case: - Via email, the system must allow the EO to create a new 'CM Document' record and upload the email from the IW. - Via phone call, the system must allow the EO to 'log a call' and automatically create a 'CM Document' record. - The system must allow the EO to navigate to the 'Decision' tab on the case. - The system must allow the EO to select 'Reopen Claim'. - The system must allow the EO to select at least one or multiple injuries to Reopen on the case - The system must only display injuries that have been previously withdrawn. - The system must allow the EO to create the decision - The system must default the 'Decision Status' to 'Pending' and lock the field. - The system must default the 'Decision Reason' to 'New Claim' and lock the field. - The system must allow the EO to enter in the 'Document Reference

 <https://acme-my.sharepoint.com/pr/as...> [Connect](#)

Number' for the record of the re-open withdrawn request from the IW.

- d. The system must default the 'Record Status' to 'Active' and lock the field.
 - e. The system must allow the EO to enter in the 'Decision Date'.
 - i. The system must not allow the decision date to precede the date of withdrawal of the injury.
 - f. The system must allow the EO to enter in any additional information in 'Decision Comments'
 - g. The system must allow the EO to select 'save'
6. Once save has been selected by the EO, the system must:
- a. Create a decision record
 - b. Automatically send an email to the IW and Employer using a predefined email template confirming that the case has been reopened
 - c. Automatically send an SMS to the IW using a predefined template confirming that the case has been reopened
 - d. Update status against the injury on the 'Injury Item' tab on the claim to 'Pending'
 - e. Update the status against the claim to 'pending'
 - f. If the claim was withdrawn previously, meaning all injuries were previously withdrawn, the system must place the claim back through the EO allocation tool

			g. If an MCM is required, the system must allow the EO to reinitiate the assignment again
3.5 Manage Claim Withdrawal	3.5.2 Re-open the Injury - Restart KPIs	3.5.2.2 As an EO, I want the system to restart the Days KPI clock from the date the case was withdrawn when a case is re-opened	- When the case has been re-opened by the EO, the system must create a new case milestone to track the following milestones: 'Interim Benefits Days' if within the 0 - 10 day range 'Business Days Since Lodgement' - Upon creation of the new case milestone, the system must continue the Days clock from the date that the case was withdrawn on the new case millstone - Case is 'frozen' between when the case is withdrawn (1st milestone) and reopened again (2nd milestone) to inform KPIs
3.5 Manage Claim Withdrawal	3.5.3 All	3.5.3.1 As an EO, I want to view the decision record for a withdrawn or re-opened decision that I have made	- The system must allow an EO to select a decision record from the 'Decision' tab on the case - The system must display the following on the 'Decion Record': - Decision Details - Decision Name - Decision type - Decision Status - Claim ID - Case - Created by - Created On - Linked Injuries - Name - Injury Details

	Decision Date					of Injury Must not be a date in the future
Withdraw Claim	Decision Comments		Text	No		
Reopen Claim	Select Injury	Predefined list of Injury Items. Must only display an injury item that has been withdrawn.	Checklist	Yes		Must select at least one Injury Item to continue
Reopen Claim	Create Decision - Decision Status	Default to 'Pending'	Picklist	Yes	Accepted Incident Pending Rejected Withdrawn Active	Must default to 'Pending' and be greyed out
Reopen Claim	Create Decision - Decision Reason	Default to 'New Claim'	Picklist	Yes		Must default to 'New Claim' and be greyed out
Reopen Claim	Create Decision-		Text	No		
		'Active'	Picklist	Yes	Active Awaiting Approval	Must default to 'Acitve' and be greyed out

	Record Status				Cancelled Superseded	
Reopen Claim	Create Decision - Decision Date		Date	Yes		Must not precede the date of withdrawal
Reopen Claim	Decision Comments		Text			

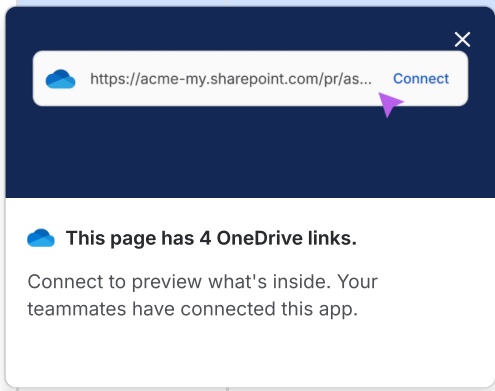

3.4 Integration

User Story	Acceptance Criteria	Integration Details
3.5 - Manage claim withdrawal	3.5.1.1 As an EO, I want to be able to withdraw an Injury on a case upon the request of the IW 3.5.2.1 As an EO, I want to be able to re-open a withdrawn Injury upon the request of the IW	Update decision sent to Curam - Salesforce will use a platform event for a “decision” to be updated in Curam - Integration details captured in more detail here - Determination Decisions - Salesforce to Curam Integration

3.5 Reporting

Not applicable - no specific reporting requirements have been identified for Epic E.

4. Key Design Decisions

	Decision Outcome	Decision Forum
	- The Day KPI milestone will stop when all injuries against a case are withdrawn. - If any of the injuries on the case are re-opened a new Day KPI will be started from	Hot House Discussion

		the date that the original Day KPI stopped.	
05/06/2025	Automated email when withdrawing a case	An email will only be automatically sent to the IW / Employer / MCM when all injuries on the case have been withdrawn resulting in the withdrawal of the claim	Hot House Discussion
29/04/2025	Result of withdrawing a case	- Once the case is withdrawn: - MCM is removed as the claim owner - replaced with GB / EML work queue. - The case owner will be changed from EO to the GB / EML work queue. This will release the EO capacity. - EO and MCM still need to be part of the case team with read / write access.	Hot House Discussion
29/04/2025	Result of re-opening a case	- Once the case is re-opened: - The case goes back through the EO allocation tool - no rule to go back to the original EO (existing pattern). - For MCM the EO will need to reinitiate the assignment again (existing pattern).	Hot House Discussion
